

Take control of your energy production

MarVal Solar

The sun provides an abundant source of clean, renewable energy. This can be converted into electricity using solar photovoltaic panels, referred to as 'solar PV'.

At MarVal Power we have a strong track record in delivering commercial scale rooftop installations throughout the UK and Ireland. Our turnkey solution enables our clients to generate clean, affordable energy with a long-term investment return. Once energised, you can see in real time how much energy is being produced directly from your smartphone.

Developing reliable, adaptable and affordable solutions that cut your energy costs is at the core of everything we do.

Produce and consume
your own energy

Save money

Sustainable
future

We make it simple

To find out more on how solar energy can benefit your business...

Get in touch...

We will carry out an energy audit and provide a proposal base on your requirements. After that we will design and install the plant/kit and finally you will be **energised and start saving**
